## SECURITY RISK MANAGEMENT

### LEAD WITH INTELLIGENCE.

NtelSec's innovative process incorporates key elements of the U.S. Intelligence Community's Intelligence Cycle and efficiently adapts them to your company's unique challenges and resources.

### WHAT'S AT STAKE?

Everyone and everything that matters to your organization. The safety of your executives, staff, clients, vendors and customers. The security of your intellectual property, events, trade secrets, supply chain, financial and customer databases, locations, warehouses, construction sites and fleets as well as your company's brand, reputation and profitability.

Elevating  
Corporate Security  
Programs -  
Locally, Regionally  
and Globally.

### SECURITY IS EVERYONE'S JOB.

Do concerns of terrorism, insider threat, crisis management and others keep you, your stakeholders, and your staff up at night right now? Are they being addressed?

Like many organizations, you may have a patchwork of security measures in place within your IT, security, legal and human resources departments.

But do they talk to each other regularly or only in an emergency? Are your current systems outdated for today's threats?

Effective intelligence programs ensure that everyone understands the information that needs to be shared company-wide and deploys individuals' unique talents and skills to help protect what matters most.

Let us show you how much better your security could be.

### MAXIMIZE YOUR BUDGET.

What have you budgeted for security? Is it enough or more than enough? With our accomplished security experts' independent perspective, you'll be privy to the tradecraft methods that will help you prioritize and control your security-related costs.
